Modular Plastic Drawer Unit

3-Compartment Transparent Storage & Organizing Cabinet

CODE: 120-3

PRODUCT OVERVIEW

The 120-3 drawer unit is engineered for organized, secure, and rapid-access storage of small to medium-sized hardware components in workshops, industrial facilities, warehouses, and technical service environments. Its impact-resistant blue frame and clear transparent drawers allow instant visual inventory checks without opening the compartments. With integrated top and lateral interlocking channels, multiple units can be securely combined horizontally and vertically to create custom storage walls.

TECHNICAL SPECIFICATIONS & LOGISTICS

Parameter	Specification / Details
Product Code	120-3
Description	3-Compartment Plastic Drawer Unit
External Dimensions (W × D × H)	370 × 204 × 160 mm
Drawer Inner Dimensions (W × D × H)	112 × 193 × 150 mm
Housing Color	Blue
Drawer Configuration	Transparent with integrated front pull handle and label slot
Pallet Capacity (100×120 cm)	144 Units
Truck Load Capacity	3,744 Units

KEY FEATURES & ADVANTAGES

- **High Visibility:** Crystal-clear drawer bins eliminate the need to open compartments for part identification, streamlining retrieval and inventory tracking.
- **Substantial Internal Depth & Height:** With an interior height of 150 mm, it accommodates larger items, bulk fasteners, tool accessories, and replacement parts.
- **Interlocking Modular Assembly:** Pre-formed top and side coupling tracks enable rigid interlocking with other compatible units from the same series.
- **Industrial Durability:** Resilient construction engineered to withstand daily operational wear, mechanical shock, dust, and workshop contaminants.
