Modular Plastic Drawer Unit

9-Compartment Transparent Storage & Organizing Cabinet

CODE: 120-9

PRODUCT OVERVIEW

The 120-9 drawer unit is an industrial-grade, high-density storage organizer engineered for precision classification of micro and small hardware, electronic components, fasteners, and assembly parts. Designed with a 3-tier, 3-column configuration (9 independent clear compartments), it keeps diverse items strictly partitioned while enabling immediate visual inventory verification without opening the drawers. Interlocking tracks molded into the top and side panels allow seamless horizontal coupling and vertical stacking with other modular units across the 120 series.

TECHNICAL SPECIFICATIONS & LOGISTICS

Parameter	Specification / Details
Product Code	120-9
Description	9-Compartment Plastic Drawer Unit
Drawer Layout	9 Drawers (3 Rows × 3 Columns)
External Dimensions (W × D × H)	370 × 204 × 160 mm
Drawer Inner Dimensions (W × D × H)	112 × 193 × 46 mm
Housing Color	Blue
Drawer Configuration	Transparent with integrated front pull handle & label slot
Pallet Capacity (100×120 cm)	144 Units
Truck Load Capacity	3,744 Units

KEY FEATURES & ADVANTAGES

- **High-Density 3×3 Partitioning:** 9 independent compartments keep diverse micro fasteners, SMD components, and terminal hardware neatly segregated in a compact space.
- **High Visibility & Instant Audit:** Crystal-clear drawer bins eliminate search time and allow at-a-glance stock assessment.
- **Label Holders & Ergonomic Pulls:** Molded front pulls provide smooth opening, while recessed label slots simplify part numbering and barcode tracking.
- **Interlocking Modularity:** Fully compatible with the 120 series (120-3, 120-4, 120-6) to build custom storage towers, workbench racks, or wall arrays.
- **Industrial Durability:** Engineered with a robust polymer frame to withstand demanding workshop environments, mechanical impacts, and chemical residues.
